KEW BRIDGE
The bones of woolly mammoth, rhinoceros and hippopotamus have been found in the river here – some as old as half a million years. There have been three bridges at Kew, the first in 1759 replacing an earlier ferry. The path along the Hollows contains many steep steps and is regularly inundated by the tide so the walker may want to start at Watermans Park.

WATERMANS PARK BRENTFORD
This lovely waterside park was once a gas works! Look out for the Kew Bridge Steam Museum tower and the changes in the tide when the river can empty completely. Where children now play, Julius Caesar is rumoured to have crossed the river here during the Roman invasion of England.

THAMES ISLANDS
Many of the Thames islands are now designated as nature reserves where herons can be seen nesting in the willow trees and feeding along the river’s edge. Some of the boat scenes from the film ‘The African Queen’ were filmed on Lots Ait (immediately opposite the Watermans Arts Centre).

THE GRAND UNION CANAL
Ferry Quays is at the entrance of the Grand Union Canal. Once a bustling inland port the area is now mainly housing. Look out for the remaining boat builders as they are quickly disappearing. The canal links the Thames with Birmingham, Bristol and Liverpool, a journey of four weeks by narrow boat!

SYON PARK
The London home of the Dukes of Northumberland, Syon Park was designed by Capability Brown in the 1760s and is currently being restored back to its former glory.

ISLEWORTH
Leaving Syon Park, the walk rejoins the riverside at Isleworth. One of England’s finest artists J.M.W Turner lived near the church. The walk turns from the riverside at Isleworth and follows the road to Railshead Road where the river should be re-joined (to the left just after the ‘welcome to the London Borough of Richmond Upon Thames’ sign).

ST MARGARETS
St Margarets was historically an important centre for the making of gunpowder. Today the river is far quieter and is an important nursery ground for fish. Just 50 years ago the River Thames was so polluted that it was biologically dead. From the 1960s onwards the Thames has been cleaned and today over 120 different types of fish are found including flounder, pike and eel.

RICHMOND
Historic Richmond, the home of Kings and Queens was chosen due to its pleasant position under Richmond Hill, good hunting and easy access by rowing boat to central London. Richmond Palace was the main home of the Tudor monarchs who referred to it as their ‘winterbox’. Queen Elizabeth I died at the Palace in 1603 and was rowed by state barge to Westminster to be buried. From Richmond the H37 or 65 bus can be taken back to Brentford.

THE OLD DEER PARK
Originally laid out as a Royal Hunting Park, the line of the Kew Meridian can be seen (marked by a series of obelisks) from which the ‘King’s Time’ was measured. Continue along the towpath through the wet woodland – a very special habitat for birds and insects. Kingfishers can be seen in this area.

KEW TOWPATH & KEW GARDENS
As you walk along the towpath cast an eye across the river to Isleworth. It is hard to believe that you are only eight miles from central London. The waterside flood meadows of Syon House, grazed by a herd of cows, is now the most important nature reserve along London’s river being the only natural riverbank left in the capital. The tidally flooded willows by the river provide shade for the Two-tipped Door Snail and the German Hairy Snail – that is one of the rarest species in Britain. It is about 4-6 mm across, milk chocolate coloured with tiny bristles that might help it to float. The towpath continues alongside the world famous Kew Gardens where you can explore the world’s largest collection of rare and exotic plants, as well as the historic glasshouses.

DISCOVER THE ARCADIAN THAMES
Explore the fascinating and historic River Thames on your doorstep. Places to see, wonderful river facts, access information, public transport, picnic spots and lots more.
Access Information: Some sections of the walk have a rough and uneven surface. There are several trip hazards. A series of accessible guides are available on the TLS website.

Key:
- Bus Route
- The Arcadian Thames Walk
- Thames Path
- Tripboat Stop
- Pub

Approximate Distance: 10 km (6 miles) (3 hours)

BE SAFE AND ENJOY YOUR VISIT
The foreshore is an amazing place to discover hidden treasures and play, but please be aware of the following:
- Wash hands before eating and drinking.
- Wear sensible shoes/wellies for walking on the shore.
- Do not wander off on your own, the tide can turn suddenly.
- Be aware of deep mud.
- Advise children not to run, there are often hidden trip hazards.
- Keep an eye out for passing boats – they may produce a sudden wash.
- This area is tidal, so please be aware that the tide will come in and may flood certain areas. If unsure, check the times of the tides before setting out.

The Arcadian Thames Walk
The TLS aims to conserve, enhance and promote the remarkable Arcadian Thames between Hampton and Kew. For more about the TLS and useful visitor information please go to: www.thames-landscape-strategy.org.uk

There could be a better way to travel
When you explore the many wonderful treasures dotted along the Arcadian Thames you will find that there are many different ways to get around. Smarter Travel Richmond provides travel advice and support for people living, working or visiting the area to explore cheaper, easier and healthier ways to enjoy the experience. For more information please visit: www.smartertravelrichmond.org
